DETAILED ACTION

This action is in response to the amendment filed on 4/6/07.

Claim 5 has been canceled.

New claim 8 has been added.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Olesen et al. 4,573,625 in view of Sesek et al 6,923,360.

Olesen discloses a stapler comprising a cartridge 90 with staple members in a straight shape 94, a striking portion formed with a striking path, a magazine at 32, a staple supply mechanism formed in the magazine as shown in Figs. 9-10, a forming plate 70 that forms the staple member in a c-shape, a driver plate 80, a clincher mechanism that folds and bends a leg of the staple member as shown in Figs. 5-6, and a movable anvil 60 (claim 1); the driver plate 80 and the forming plate 70 are operated on a same plane (claim 2); wherein the forming plate is formed by a plate member with legs 72 having a thickness substantially as claimed and wherein the driver plate is formed by a plate member having a thickness at 180 substantially the same as a width dimension of a section of the staple member (claim 3); wherein the striking portion is formed at a front end of 102 of the cartridge 90 (claim 4); a staple guide 102 and a fixed anvil via 100 formed at a front end portion of the staple guide 102 (claim 6).

Art Unit: 3721

With respect to claims 1 and 7-8, it has been held that the recitation that an element is "capable of performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. In re Hutchison, 69 USPQ 138. Therefore, little consideration has been given to the limitation of "wherein the forming plate is capable of forming the staple member...". However, Seseek teaches the concept of stapler having a forming plate and anvil member which form more than one staple at a time as 42 (see col. 12, lines 6-24) for the purpose of minimizing a force required to drive the staples into a stack of papers. It would have been obvious to one having ordinary skill in the art to have modified Olesen's forming plate to be capable of forming two staple simultaneously as taught by Seseek in order to provided a multiple-preformed staple which minimize the force required to drive the staples into a stack of papers.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive.

In response to applicant's argument that Olesen does not disclose or suggest the ability to form two staple at once, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3721

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
